Aims and Scope

Nuclear Physics B focuses on the domain of **high energy physics** and **quantum field theory**, and includes three main sections, i.e. **particle physics** (including particle physics; cosmology, astrophysics and gravitation; the physics of hadrons; computer simulations in physics; methods in theoretical physics), **field theory** and **statistical systems** and **physical mathematics**. The emphasis is on original research papers.

Conference proceedings on the topics covered by **Nuclear Physics B** are published in the (separately available) journal **Nuclear Physics B – Proceedings Supplements**.
